ABOUT US

Tile & Co is the North American extension of Grupo Decor, a leading Colombian distributor specializing in premium flooring, wall, and bathroom solutions. With over 34 years of expertise and more than 30 stores nationwide, Grupo Decor distributes elite brands such as Kohler, Hansgrohe, and Porcelanosa, ensuring unparalleled quality and design.

As a proud member of the Klipen Group—an international organization with over 150 factories across four continents and more than 7,000 unique product SKUs—we complete over 5,000 projects each year across various countries.

Our entry into the North American market was marked by the acquisition of Tile & Co in 2024, a boutique flooring and wall retailer based in Boca Raton, FL. We specialize in premium flooring, wall, and bathroom solutions, partnering with designers, architects, developers, and builders (GCs and installers) to deliver exceptional quality and pricing through our extensive network. Our mission is to help clients create inspired spaces that reflect their unique visions.

TILE & CO.

MEMBERS OF KLIPEN GROUP:

FERCO (Guatemala, Honduras, El Salvador), Grupo Decor (Colombia), Decor Center (Peru), Tumpar (Bolivia), MK (Chile), Bosch y Ciam (Uruguay), and in the United States with Tile & Co.

TILE & CO.

4 1 ZERO4 2

La semplicità di un codice d'avviamento postale per identificare un luogo d'appartenenza e tutti i valori che ad esso sono legati. Uno spazio creativo, che mira all'eccellenza del materiale ceramico, all'importanza della sua ricerca e ai suoi contenuti. Un linguaggio che prende forma dalla contaminazione di diversi elementi provenienti da svariati contesti. Elementi dal sapore industriale accostati ad altri dal carattere fortemente artigianale, molteplicità di linguaggi interconnessi danno vita a nuove vesti per la progettazione architettonica. Per noi, un'idea o un progetto devono necessariamente trasmettere e veicolare un contenuto, una storia. Così le storie - che ci emozionano, appassionano e che cerchiamo di raccontarvi - divengono la linfa della nostra curiosità e creatività. Chiamateci cantastorie, non ci offenderemo.

The simplicity of a ZIP code to identify a place of belonging and all the values that are related to it. A creative space, which aims for excellence in ceramics, the importance of his research and its content. A language that is shaped by the contamination of elements from many different contexts. Industrial and artisanal elements are mixed despite of their different nature: a multitude of interconnected languages bring to life a new vest for architectural design. An idea or a project needs to transmit and convey content, a story. The stories - that excite us, that we are passionate about and that we try to tell - become the lifeblood of our curiosity and creativity. Call us storytellers, we will not be offended.

TOTEM LAYING INSTRUCTIONS

Prima di iniziare il processo di installazione, assicurarsi che la superficie di posa sia livellata e sia stata accuratamente pulita. Per una corretta installazione è essenziale l'utilizzo di adesivi conformi ed adeguati alla destinazione d'uso. Per installazioni in ambienti umidi, come bagni e docce, per evitare l'infiltrazione di acqua, assicurarsi di impermeabilizzare in modo corretto la superficie di posa, utilizzando prodotti specifici a tal fine. In corrispondenza di tagli, avere cura di sigillare la zona interessata con silicone, così da evitare ulteriori infiltrazioni di acqua.

Before starting the installation process, make sure that the surface is level and has been thoroughly cleaned. For proper installation, it is essential to use adhesives that are compliant and suitable for the intended purpose. For installations in humid environment, such as bathrooms and showers, it is highly recommended to properly waterproof the laying surface using specific products for this purpose to avoid any water infiltration. In case of cuts, take care in sealing the affected area with silicon so as to avoid any further water infiltration.

Al prodotto viene conferito un aspetto artigianale grazie a planarità variabile, superficie strutturata, stesura dello smalto non uniforme e piccole irregolarità dello smalto. Lo stesso calibro tra le varie referenze non è sempre garantito. Consigliamo una fuga di 2/3 mm adatta a prodotti naturali. I colori sono riconducibili alla scala cromatica NCS.

A handcrafted look is given to the product through variable flatness, structured surface, non-uniform coating of glaze and small irregularities of the glaze. The same caliber between tiles is not always guaranteed. We recommend a joint of 2/3 mm suitable for natural products. Colors are consistent with the NCS color scale.

LA MATITA WOOD PUÒ ESSERE APPLICATA PER IL RIVESTIMENTO DI PARETI INTERNE, SIA IN SPAZI RESIDENZIALI CHE PUBBLICI, È SCONSIGLIATA PER ZONE A DIRETTO CONTATTO CON L'ACQUA: DOCCE, SAUNE, PARETI DI PISCINE ECC.
THE WOOD PENCIL CAN BE USED FOR INTERIOR WALLS IN BOTH RESIDENTIAL AND PUBLIC SPACES, IT IS NOT RECOMMENDED TO USE IT FOR AREAS IN DIRECT CONTACT WITH WATER: SHOWERS, SAUNAS, POOL WALLS ETC.

KAPPA CONFIGURATOR

Kappa è una collezione dalle infinite possibilità realizzative, abbiamo sviluppato un simulatore con 16 differenti schemi di posa, volutamente scelti a trama ripetibile per poter dimostrare come può cambiare la resa di un singolo pattern modificandone solo il colore del prodotto e dello stucco. Facilmente accessibile attraverso il nostro sito web, all'interno della collezione Kappa, oppure digitando su internet kappa.41zero42.com, si potrà personalizzare il modello selezionato, con conteggio finale automatico del numero di pezzi, scatole, metri quadrati e sfrido necessario a realizzare la propria composizione. Il conteggio sarà della metratura richiesta, avendo inserito precedentemente le dimensioni che si vogliono ottenere, ma l'area massima visualizzabile di posa sarà di 500x280 cm - base x altezza. Inoltre potrai visionare gli ultimi 41 schemi realizzati precedentemente.

Kappa is a collection with an infinite range of possibilities, that's why we have developed a simulator with 16 different laying patterns, deliberately chosen with repeatable patterns in order to demonstrate how the performance of a single pattern can be changed through the simple modification of the color of the product and the grout. You can easily access it through our website, as part of the Kappa 41 collection, or by typing kappa.41zero42.com on the internet. Thanks to the simulator, you can customize the selected model with an automatic final count of the number of pieces, boxes, square meters, and scrap needed to make your composition. The count will be of the required square footage, having previously entered the dimensions you want to obtain, but the 500x280 cm viewable area of laying will be, you will be able to see the last 41 schemes previously realized.

KAPPA LAYING INSTRUCTIONS

Prima di iniziare il processo di installazione, assicurarsi che la superficie di posa sia livellata e sia stata accuratamente pulita. Per una corretta installazione è essenziale l'utilizzo di adesivi conformi ed adeguati alla destinazione d'uso. Per installazioni in ambienti umidi, come bagni e docce, per evitare l'infiltrazione di acqua, assicurarsi di impermeabilizzare in modo corretto la superficie di posa, utilizzando prodotti specifici a tal fine. In corrispondenza di tagli, avere cura di sigillare la zona interessata con silicone, così da evitare ulteriori infiltrazioni di acqua.

Before starting the installation process, make sure that the surface is level and has been thoroughly cleaned. For proper installation, it is essential to use adhesives that are compliant and suitable for the intended purpose. For installations in humid environment, such as bathrooms and showers, it is highly recommended to properly waterproof the laying surface using specific products for this purpose to avoid any water infiltration. In case of cuts, take care in sealing the affected area with silicon so as to avoid any further water infiltration.

Al prodotto viene conferito un aspetto artigianale grazie a irregolarità di bordi, planarità variabile, angoli smussati e superficie strutturata. Quest'ultima, a seconda del colore dello smalto, può assumere in controllo un aspetto più o meno opaco. Lo stesso calibro tra le varie referenze non è sempre garantito. Consigliamo una fuga di 3/4 mm adatta a prodotti naturali. I colori sono riconducibili alla scala cromatica NCS.

A handcrafted look is given to the product through edge irregularities, variable flatness, rounded corners, and textured surface. Depending on the color of the glaze, the surface can take on a more or less opaque appearance against the light. The same caliber between tiles is not always guaranteed. We recommend a joint of 3/4 mm suitable for natural products. Colors are consistent with the NCS color scale.

INFO

Brick è un manufatto prodotto artigianalmente per estrusione, con materie prime che eccellono per qualità e caratteristiche estetiche e di utilizzo. Tale processo crea un prodotto che presenta differenze di calibro, irregolarità superficiali o di planarità; caratteristiche da considerarsi proprie del materiale. La versione Lux, inoltre, è arricchita da una cristallina lucida: piccole spillature e leggere differenze di stesura dello smalto, che possono verificarsi, sono un effetto tipico di prodotti artigianali. Queste caratteristiche uniche, se valorizzate durante la posa, esaltano l'effetto estetico che lo differenzia dai normali prodotti industriali. In aggiunta è stata fatta una ricerca sulle miscele di impasti in modo tale da ottenere una netta diversità di toni e poter creare disomogeneità cromatica. In fase di posa è importante miscelare in modo casuale i pezzi delle varie scatole per una resa più armonica. Posare il materiale utilizzando collante per il grès porcellanato. Trattandosi di materiale estruso di forma non regolare consigliamo di posare i pezzi accostandoli e ruotandoli senza usare distanziali, in modo che le fughe si vengano a formare automaticamente in modo ideale. Per compensare eventuali differenze di planarità è possibile caricare di collante anche il pezzo stesso.

Brick is a handmade product obtained through extrusion, employing raw materials that stand out for their quality, aesthetic characteristics and use. The product resulting from this process might show differences in size, surface irregularity or planarity; these aspects are to be considered distinctive characteristics of the material itself. Besides, the Lux version comes with a glossy glazed finish; regarding this aspect, the potential presence of small pinholes and minor differences in the application of the glaze is to be regarded as a typical feature of handmade products. If enhanced during the installation, these unique characteristics will emphasize the aesthetic look that differentiates this product from normal industrial ones. Additionally, research has been carried out on blends of mixtures in order to obtain a clear differentiation of tones and to create chromatic diversity. During the laying phase it is important to mix randomly the different pieces of the boxes to achieve a more harmonic result. Lay the material using porcelain stoneware glue. Being extruded material of irregular shape, it is recommended to lay the pieces by placing them side by side and rotating them without using spacers, to ensure that the joints are created automatically in an optimal way. Also, it is possible to apply the glue to directly on the piece in order to compensate for any differences in planarity.

SPECTRE

Spectre Milk Hologram 5x25

Wall Spectre Rose Hologram 5x25 - Desk Spectre Rose Glossy 5x25 - Floor Futura Black 15x15

TECHNICAL DETAILS

SPECTRE

TECHNOLOGY **MONOCOTTURA IN PASTA BIANCA - WHITE BODY SINGLE-FIRED WALL TILE**

FINISH **OPACA / LUCIDA / HOLOGRAM - MATTE / GLOSSY / HOLOGRAM SIZES 5x25**

THICKNESS **8 MM**

All'interno di ogni scatola mix Hologram c'è un 24% di finitura Hologram, un 38% di finitura Matte e un 38% di finitura Glossy. La finitura Hologram, attraverso una smaltatura di metalli preziosi, ricrea lo spettro di luce. Ogni pezzo presenta dei gradienti differenti con accumuli sui bordi che sono caratteristica peculiare del prodotto. I colori dei pezzi possono variare con sfumature giallo/verde, verde/azzurro, giallo/arancione, giallo/rosa fino ad arrivare al fucsia e al blu metallizzato. A seconda di dove lo si guarda e al mutare della luce, ogni pezzo cambia cromia e riflettanza. Consigliamo di posare il prodotto non accostando mai due pezzi di Hologram vicini ma miscelandoli tra la finitura opaca e quella lucida. Raccogliamo di usare fughe in stucco cementizio di colore bianco. Per la pulizia si raccomanda di non utilizzare acidi aggressivi ma prodotti da supermercato. Non utilizzare spugne abrasive che possano graffiare la superficie del prodotto.

Inside each Hologram mix box there is a 24% Hologram finish, a 38% Matte finish and a 38% Glossy finish. The Hologram finish recreates the light spectrum through a glazing of precious metals. Each piece has different gradients with accumulations on the edges that are a peculiar feature of the product. The colours of the pieces may vary with shades of yellow/green, green/blue, yellow/orange, yellow/pink up to fuchsia and metallic blue. Each piece changes in colour and reflectivity depending on where you look at it and the changing of light. We recommend laying the product never putting two pieces of Hologram close together but mixing them between the matte and glossy finishes. We recommend using white cement grout joints. We recommend not using aggressive acids for cleaning but supermarket products. Do not use abrasive sponges as they can scratch the product surface.

DURANTE LA NECESSARIA FASE DI RETTIFICA DEL PRODOTTO SI POSSONO VERIFICARE DIFFERENZE DI ALCUNI MILLIMETRI CHE NON PERMETTONO DI GARANTIRE IL PERFETTO ALLINEAMENTO DELLE VARIE BACCHETTE. CONSIGLIAMO, PERTANTO, DI RUOTARE LE SINGOLE PIASTRELLE PRIMA DELLA POSA IN MODO TALE DA TROVARE SEMPRE LA COMBINAZIONE MIGLIORE. UN DISALLINEAMENTO È PERTANTO DA RITENERSI NORMALE.

DURING THE NECESSARY PHASE OF PRODUCT GRINDING, DIFFERENCES OF A FEW MILLIMETRES MAY NOT GUARANTEE THE PERFECT ALIGNMENT OF THE RODS. WE RECOMMEND TO ROTATE THE INDIVIDUAL TILES BEFORE LAYING TO FIND THE BEST COMBINATION. A MISALIGNMENT IS TO BE CONSIDERED NORMAL.

FINISH OPACO - NATURAL

FEATURES TONI E CALIBRI DIFFERENTI SONO CARATTERISTICHE INTRINSECHE DEL PRODOTTO

SLIGHT SHADE AND CALIBER VARIATIONS ARE AN INTRINSIC PROPERTY OF THIS ARTISAN PORCELAIN

THICKNESS 8 MM

Questo è un manufatto artigianale prodotto per estrusione e con materie prime naturali, per questi motivi presenta differenze di calibro, irregolarità superficiali o di planarità e variazioni di tono. Queste sono da considerarsi caratteristiche proprie del materiale. Se valorizzate durante la posa esaltano l'effetto estetico che lo differenzia dai normali prodotti industriali. In produzione, durante la scelta finale di ogni lotto, viene selezionato il tono, pur se può rimanere una diversità di rifrazione della luce tra i pezzi singoli che può dare l'impressione di differenza di colore. In fase di posa è importante aprire una o più scatole e disporre i pezzi a terra per verificare questo effetto, osservando anche da diverse angolazioni. Qualora si notino differenze procedere all'installazione miscelando in modo casuale i pezzi delle varie scatole per evitare l'effetto "strisce" o "bande". Posare il materiale utilizzando collante per il grès porcellanato. Trattandosi di materiale estruso di forma non regolare consigliamo di posare i pezzi accostandoli e ruotandoli senza usare distanziali, in modo che le fughe si vengano a formare automaticamente in modo ideale. Per compensare eventuali differenze di planarità è possibile caricare di collante anche il pezzo stesso.

This is an extruded handcrafted product made from natural raw materials. It may therefore present differences in caliber, flatness, surface irregularities and variations in shade. These should be considered as features of the material and not defects. If one takes advantage of them during installation, they enhance the aesthetic effects that distinguish them from standard industrial products. During the production process, the shade is chosen at the final sorting stage of each batch, even if there may be a different refraction of light between the individual pieces that can give the impression that the colour is different. During installation, it is important to open one or more boxes and arrange the pieces on the floor in order to examine this effect and to view the pieces from different angles. If differences are noticed, mix random pieces from different boxes when installing them in order to avoid the "strip and "band" effect. Install the product using an adhesive suitable for porcelain stoneware. Being an extruded product, which doesn't have a regular shape, we recommend that the pieces be placed next to one another, without using spacers, and rotated so that the joints become formed naturally. Adhesive can also be applied to the back of the tile itself in order to compensate for differences in flatness.
